About US

We are a crypto token that is set aside from all the others by design to help our investors to grow their wealth. The way we achieve our unique status is by the implementation of a collaborative and cooperative investment mindset.

What this means is that every investor collaborates to the growth of the other investor's wealth with a cooperative contribution to the many. We believe that we are the vehicle that will take each and every one of our investors to gain financial independence at an exponential rate.

We are passionate in focusing on the interest of every investor to reach their financial wealth regardless of the amount of their investment into our token at quantum speed.

OHN PROTOCOL

We implement a collaborative and cooperative investment mindset to reward holders. It does this by applying a 7% tax on transactions:

- - 2% goes to BNB Reward Pool
- - 2% goes to liquidity
- - 2% is instantly distributed among Tokens holders
- - 1% goes to guaranteed assurance plan

This takes place while you sleep to ensure your financial wealth grows.

TOKENOMICS

- 50% burnt forever
- 15% distributed to early investors
- 10% for marketing
- 15% for future development
- 10% liquidity pool for pancake swap
